WATER FLOW (L/MIN): 12 - 30 l/min

250 BAR

MAXIMUM PRESSURE

NO DUST

HEALTH PLUS

Standard blast medium

V-TUF H4.011 SAND BLASTING KIT a favourite but effective attachment which injects sand into the high-pressure water jet and turns your pressure washer into a sand blaster.

High-Pressure Abrasive Blasting Kit blasts out up to 750 lbs. of abrasive per hour for fast cleaning and rust removal.

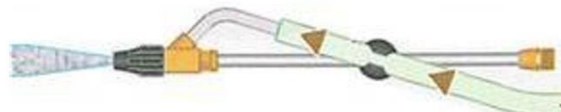

- **Application:** Proven ideal for removing rust and stubborn dirt.
- **Big advantage:** This method is the only way to sandblast without the need for extraction and breathing equipment.
- **The recommended blast media:** Most popular is Kiln Dried Sand (Available from most builder's merchants or suppliers). Fine silica sand & medium to coarse grit is also used. The media must be dry and the media intake port in the sand blast head must always be held above the water stream. - See lower two images.
- **Components included:** Sand blaster head on 500mm tube with Inlet fitting: M22M, 4m flexible blast media suction pipe with rigid media pick up head.

Please note: Specifications can change without prior notice and images are for illustration only. E&OE
